Trim Marks

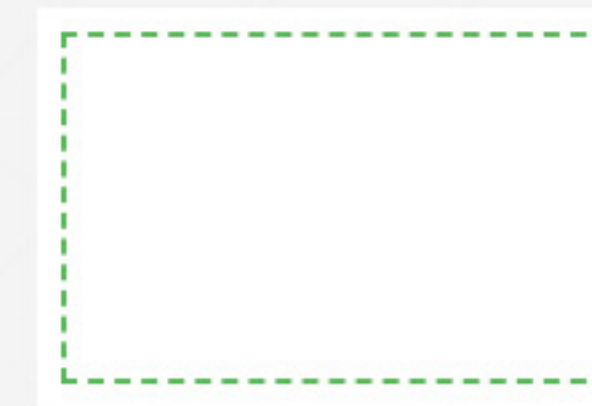

When printing we print on larger paper and then cut it down to size. We use these guide lines to aim where to cut.

Bleed Margins

This area is cut off. Make sure background Colour overflows into this margin for an edge to edge design.

Safe Zone

Keep important text and logos inside the safe zone. This is because printers can sometimes print with a minor skew.

Clear Zone

We need to make sure addresses and barcodes can be machine readable by keeping these areas clear.
