

Sharing a file with your Account Manager

Use our Secure file transfer system to give your Account Manager data.

You're discussing your mail with your Account Manager and want to clarify something about your data or wondering about your design. Rather than sending the files through unsecure emails, you can use our Secure file transfer system to share files with us at anytime.

You can find this page under the **Files** section.

From here you can drag and drop your data or design assets. You can also create folders and organise your files to stay on top of everything. All that's left is to contact your Account Manager to let them know you've uploaded the data.
